

## On the Subject of The Seven Deadly Sins

*This is surprisingly fitting for a bomb to be perfectly honest.*

To disarm this module, press every sin exactly once. The first sin can be chosen freely, though it may not lead to a valid solution. For all subsequent presses, the following conditions must hold:

1. There must be an arrow in the below diagram going from each sin to the next.
2. Each sin must be adjacent to a sin already pressed.

If an incorrect button is pressed, a strike will be recorded and the module will go back to its initial state.
